Clickable prototype

A medium-fidelity click-through of the Fixopolis app. Each page is one screen; click the buttons on the phone to move between screens, as you would tap them in the app.

HOW TO USE

- Open in a PDF viewer that supports links (Adobe Acrobat, or Chrome/Edge). Viewing one page at a time works best.
- Each task's Start button opens the sign-in screen, so every task begins from the start of the app. Every "Back" button returns to the previous screen.
- Text fields and typing are pre-filled on the relevant screens. "INDEX" at the top of each page returns here.
